

Bridge Central London Skills Partnership Digital case study: Generative AI course

By merging New City College's commitment to high-quality education with Cyberi's expertise, the Generative AI course has been developed to provide a comprehensive curriculum tailored to the needs of businesses and professionals. Covering practical AI applications and ethical considerations, learners gain hands-on experience with real-world scenarios, positioning them as valuable assets to any organisation.

This course bridges the skills gap in AI, empowering a workforce with capabilities ready for the future. Cyberi eagerly anticipates advancing this project and shaping the next generation of AI talent.

This successful collaboration has achieved:

- 41 learners enrolled
- 43% female cohort
- Potential to expand the course globally
- Learners also gained the IBM Certification in Machine Learning with Python qualification.

“ Cyberi’s collaboration with NCC has resulted in a cutting-edge Generative AI course that equips learners with the skills and knowledge needed to drive AI innovation in the workplace. ”
